1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

As per claims 1,10, Manjunath et al (6456964) teaches a speech coding method and apparatus (abstract) comprising:

“estimating a spectral content of a speech signal by determining a defined reference spectral response representative of the spectral content of the speech signal” as determining the spectral content of the speech signal and categorizing by speech, transient, or noise (col. 5 line 55 – col. 6 line 14)

“selecting a preferential coding.....speech signal” as determining a coding method and rate based on the classification of the signal (col. 6 line 38 – col. 7 line10)

“coding the speech signal.....quantization table” as coding based on the classification of the signal (col. 6 line 38 – col. 7 line 10) and updating the filters (Fig. 10, subblock 1008; fig. 7a, subblock 706)

As per claims 3,12, Manjunath et al (6456964) teaches selecting the filter response to enhance the voice quality of the signal (as updating the filters, fig. 7a, subblock 706 that are used to reduce the error (col. 16 line 55 – col. 17 lines 15).

As per claims 4,13, Manjunath et al (6456964) teaches selection of the post processing filter to enhance the voice quality (Fig. 10, subblock 1008, choosing the filters based on the codebook parameters).

As per claims 5,14, Manjunath et al (6456964) teaches selection of the perceptual weighting filter (Fig. 8, subblock 802)

As per claims 6,15, Manjunath et al (6456964) teaches alignment, interpolation, and pitch filter update for the LPC synthesis filter (Fig. 15b)

As per claims 7-9,16-18, Manjunath et al (6456964) teaches selection of the synthesis filter and weighting filter from the decoded codebook (fig. 15a)
